MRO SIMPLIFIED

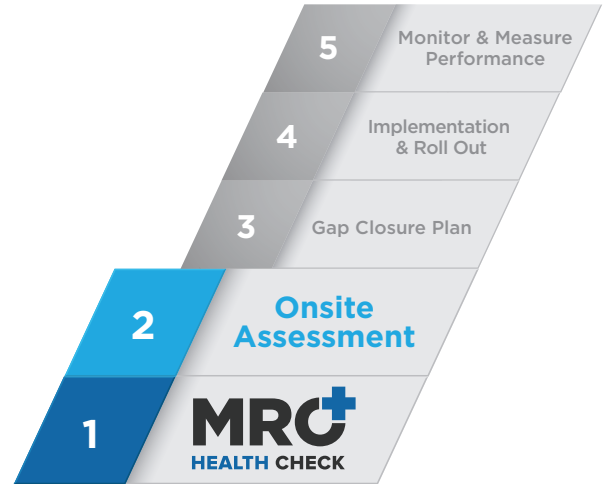

MRO Health Check

The MRO Health Check is cost friendly, upfront analysis of data and current practices across functions, providing early insights into typical improvement opportunities across work streams.

Why Would You Need It?

- To understand how your MRO Supply Chain is performing and what can be done to improve.
- To provide fact-based answers to senior management's questions on downtime and asset availability
- Identify how your MRO Supply Chain can be leveraged for a competitive advantage

Inventory Management

Provides transactional support to inventory planning process (Min/Max, Leadtime) while identifying opportunities to improve material management strategies.

Item Master Management

Help focus data cleansing efforts on the items that matter most to ongoing operations while providing oversight to master data program execution.

Procurement & Vendor Management

Inform better purchasing decision and transactional processes through robust analysis, reporting and KPI tracking.

Logistics

Deliver efficiency and productive item management and performance of suppliers and company processes from point of origin to point of consumption.

Maintenance & Reliability

Provide analytical support to accelerate item asset associations - reducing cost and time to value for core reliability deliverables.

Warehouse & Storeroom Management

Identify opportunities to improve the efficiency and effective storeroom management through analysis and KPI tracking.
