

Parts Inventory Decision Support

Asset Intensive Manufacturing Companies

face mounting pressures to operate safely, reliably and profitably in an ever-changing landscape.

Compounding the situation is the missing linkage across **Inventory Management, Maintenance & Reliability, Procurement and Finance.**

These disconnects typically result in the following outcomes:

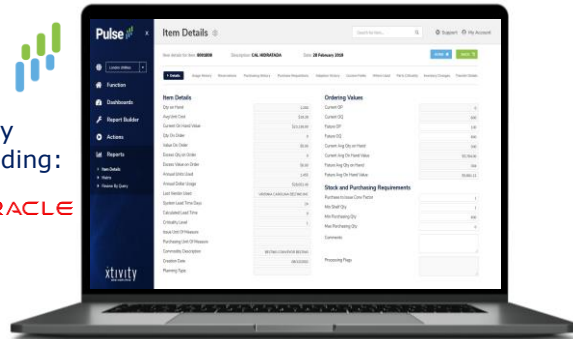

- Excess and/or Obsolete Inventory
- Low Part availability
- Unplanned Downtime
- Poor Maintenance Schedule Adherence
- Heavy Reliance on Direct Charge Purchases
- Expedited Freight & "Hot Shots"

How We Help

Introducing the Pulse, a SaaS, hosted inventory optimization software solution that leverages transactional data, combines it with analytics to provide you with improved stocking recommendations and functional reporting across your MRO Value Chain.

Works with any ERP/EAM including:
